SUMMARY

Master's student in Advanced Computer Science with expertise in process mapping, systems analysis, and stakeholder communication. Skilled in bridging business needs and technical solutions using Agile methodologies, SQL, and ML.

SKILLS

Technical Expertise : React.js, Node.js, scikit-learn, SQLAlchemy, MATLAB, Machine Learning, Natural Language Processing, AWS, Azure, Git, process mapping, system analysis, and integration workflows.

Languages : Python, Java, JavaScript, C, SQL

WORK EXPERIENCE

- Team Member , Gauselmann Group** May 2024 - Present
- Ensured smooth operation of **gaming systems and equipment**, resolving technical issues promptly to maintain customer satisfaction.
 - Utilized Excel spreadsheets for financial record-keeping, tracking daily transactions, and generating reports, improving audit accuracy by **15%**.
- Student Ambassador, School of Science, Loughborough University** Dec 2023 - Sep 2024
- Delivered excellent **customer service** and addressed prospective students' queries confidently.
 - Represented the university at events, showcasing strong **communication** and **problem-solving skills**.
 - Supported recruitment efforts through tailored solutions, contributing to a **10% increase in student applications**.
- Technical Business Analyst, Conduent Business Services, LLC** Feb 2022 - Sep 2022
- Utilized **advanced SQL** skills for complex data extraction from **relational databases** (e.g., MySQL, Oracle) to enable accurate data analysis, reducing query processing time by **30%** and informed business decision-making.
 - Conducted **business and systems analysis**, gathering requirements and creating process maps to meet client needs.
 - Combined expertise in **SQL scripting, data validation, Quality Assurance (QA)**, and diverse testing methods (manual calculations, regression, and web-based testing) to improve software performance and enhance **user satisfaction**.
- Web Developer Intern, Technophile Bud** Nov 2021 - Jan 2022
- Designed and optimized **web applications** with responsive **user interfaces** using **HTML, CSS, JavaScript**, and **React.js** to enhance interactivity and user experience.
 - Built and maintained **scalable backend systems** with **Node.js** and **Express.js**, integrating databases like **MongoDB** and **MySQL** for efficient data management.
 - Improved application performance through **asynchronous programming, API integration**, and **caching techniques**, reducing latency and ensuring seamless functionality.

PROJECTS

- SQL Query Generator with Multi-Agent NLP Integration,**
- Developed a multi-agent desktop application to generate SQL queries from natural language input using **Python** and the **OpenAI GPT model**, integrating **SQLAlchemy** for database schema management.
 - Built an intuitive **Streamlit** interface and validated performance through functional testing, achieving high **query success rates** and user satisfaction.
- Crop Recommendation Model || Machine Learning, EDA, Model Optimization, and Performance Evaluation,**
- Designed a machine learning model to recommend optimal crops based on data analysis of climatic conditions and soil features. Focused on gathering and analyzing diverse data to deliver actionable insights. Several **ML algorithms** have been analyzed and compared.
 - Models compared: Logistic Regression, Naive Bayes, Decision Tree, Random Forest, Artificial Neural Network.

EDUCATION

Loughborough University, Loughborough - Masters in Science, Advanced Computer Science Sep 2023 - Oct 2024

CERTIFICATIONS

Coding Ninjas- Data Structures in Java Apr 2023
